I am a graphic designer from Spain. Moved by curiosity and appetite for learning, my work is rooted in the deep research of concepts, seeking for the highest standart. That is why I consider myself an extremely hard worker. One of the moments that I enjoy the most, is when somebody gives me a communication problem and I have to be empathetic to really understand what they need, and how they feel. I also think that we have the responsibility to change things for the better.

Native Spanish

---

Upper intermediate English

---

## Interest & hobbies

I've been dancing and teaching *lindy hop* for about 4 years. Also, recently, I've been learning *tap dancing* as well. Since then, the asthetic of the jazz clubs from the 40's really got me!
